

Make that Dashboard Interactive!

Dynamism in Dashboards

In order to make a presentation with a dashboard, we need to tie everything in our dashboard together.

Dynamism in Dashboards

How do we get there?

- Instruct our filters to apply to all visuals built on the same data
- Use **Actions** to make our visuals themselves function as filters

Learn by doing!

Let's dive in! I'll walk you through an example (using [Stedman's Cafe Transaction Data](#)), then provide you time to create your own interactive dashboard to present with.
